Employment situation in Kastamonu

According to last statistics in Turkey, total population is 74,525,696. Male population is %50,2 and female population is %49,8 (Turkish Statistical Institute). According to a survey carried out by Turkish Statistical Institute in 2011, the unemployment rate in Turkey was %7.9. This survey also revealed that big countries have high numbers of in migration. The reason for this migration is %12,2 (268.400) for finding a job. So, it can be said that there is a risk of unemployment in small cities.

Also, according to some statistics women employment rate is 28,8 in Turkey. Our city is one of the cities that women are employed. However, it is 45,8 and it is under the total of the developed countries. The rate seems high but in real these women work in the agricultural sector.

In our city Kastamonu total population is 360,694. Male population is %49,4 and female population is % 50,6. In a year nearly 15,000 people migrates to other cities especially for education and finding jobs. The women are mostly employed for requiring no qualified people. The unemployment rate is % 3,5 in our city. But when compared with the out migration there is also a risk for the unemployment. For economic activity, % 52,8 of the employed people are working in agricultural sector. So, they don't have a social guarantee and they are heavily dependent on environmental factors.

Another statistical figure is that there is a huge employment need for sewing, confection and carpentry areas which composes mainly the traditional handicrafts of Kastamonu. Although many women work in these areas there is still a need for employers in these areas.

As a result, traditional handicrafts is a main employment area in Kastamonu. So it is important to develop entrepreneurships in these areas for both personal and local economy. Also, it is important for tourism sector in Kastamonu.

Target groups:

 Unemployed women, men and youngsters at social risk
People who hasn't reached enough educational level
People who aren't in good economic condition
Teachers and qualified instructors of handicrafts
